# Hyaluro Cell Code

## CELLULAR ACTIVATOR

The secret code to your beauty

Hyaluro Cell Code is a new and revolutionary anti-aging concept formulated with biotechnological green chemistry techniques. This concentration of actives manufactured in a "serum-emulsion" is programmed to deeply stimulate from within, producing a global 3-dimensional rejuvenating effect by moisturizing, smoothing, and firming the skin.

Hyaluro Cell Code's outstanding principle ingredient, N-acetyl-glutamide-6-Phosphate, is a natural molecule that acts upon the code skin cells use in order to synthesize Hyaluronic acid. This molecule also enhances the regeneration of fibroblasts-cells that produce collagen and elastin by 120% in 48 hours.

Hyaluro Cell Code feeds the cutaneous cells, stimulating the regeneration and supporting the production of glycoaminoglycans (84% in 10 days) and of Hyaluronic acid, ensuring a maximum plump appearance plus a complete hydration of the skin at the epidermic and dermic level.

7 high concentrate active ingredients.

Hyaluronic acid acts on the intercellular segment of the skin, protecting it from dehydration by absorbing water and maintaining moisturization within. This magnificent active is capable of retaining 300 times its own molecular weight in water.
